

## SMPK

**SMPK: An ultra-robust modular kiosk for security applications**

SMPK is a specification-grade platform that integrates all your visitor and employee processing requirements in one efficient compact configuration. The stainless steel environmental housing provides protection for sensitive equipment from vandalism and weather, while making installation and repairs easy. The unique modular construction provides owners with total freedom to change plans and implement new technologies. Best of all, modularity means the kiosks you buy today will remain in service for many years, regardless of technological change!

### Features and Options:
